B.A. Media Studies

## Employment

### Cascade Bicycle Club | Cascade.org Volunteer Cybersecurity Consultant

Seattle, WA  
Oct. 2021 - Current

Procurement to increase current security posture and meet security objectives. From preparation to SOC implementation, a collaborated effort to secure the mission to bring people together to experience the joy of bicycling through transportation, recreation, and friendship.

- Conducted risk & vulnerability assessments of the company security posture
- Advised best practices to operate inline with the NIST framework
- Conducted research & preparation of security tools to meet company security objectives
- Oversaw installation and testing of a Security Onion & service/plugin integration
- Monitored and fine tuned the SIEM to improve accuracy against false alerts

### The Law Offices of Kim & Associates Cybersecurity GRC

Queens, NY  
Sept. 2020 - Oct. 2021

Development and maintenance of network infrastructure, prioritized network availability and security for all employees within the company. Reduced network and endpoint issues, increased productivity, strengthened company security posture. Assigned to threat hunt and investigate insider threats. Collaborated directly with the DFS to develop cyber security policies in accordance to 23 NYCRR Part 500(e). Orchestrated business continuity procedures for all technologies within the company during the frequent shifts of the pandemic.

- Routine analysis of malicious files and rogue devices
- Conducted threat hunting on potential IOCs (Itarian & event logs)
- Centralized EPP & EDR to monitor malware, unauthorized apps, and system patches
- Strengthened WAPS securely for employees and limited access to visitors
- Performed audits, documented devices, SN/MAC addresses, and versions
- Imaged/clone hardened copies to reduce redeployment times of compromised machines
- Instructed acceptable use policy and security training
- Authored the 23 CRR-NY-500(e) cyber security policy to completion for the business, approved by the Department of Financial Services

### Network Engineer

Jan. 2019 - Oct. 2021

- Redesigned physical and logical design of network infrastructure
- Segmented and maintenance private NAS's and external cloud
- Administered user access, subnetting, and static IPs
- Streamlined configurations for 20+ VoIP/analog phones, 5 printers, CCTV, and peripherals
- Assembled 25+ desktop PCs, troubleshooting, and responsible for equipment budgeting
- Converted 50+ office & home PCs overnight for remote, day 1 of the pandemic shutdown
- Developed automated scripts for employees and increased productivity and office morale
- Deployed telepresence systems for 5 conference rooms for court proceedings due to the shift of the pandemic
